

**Biostimulant**  
Foliar / Soil

# MUMICEQUAL

COMPOSITION	%w/w
Total Humic extract	20
Humic acids	10
Fulvic acids	10
Potassium (K <sub>2</sub> O)	8

Humic and Fulvic acids.  
Liquid fertilizer

- **LEONARDITE ORIGIN**
- **BALANCED COMPOSITION**  
**HUMIC/FULVIC ACIDS**
- **TOTAL SOLUBILITY**

## CHARACTERISTICS

**Mumic Equal** is a mixed product of humic acids and fulvic acids from leonardite. The balanced proportion of these two groups of organic molecules, with biostimulating properties of the plant metabolism, combines the beneficial properties of humic and fulvic acids. As a consequence of the quality and purity of the original material in **Mumic Equal** and its manufacturing process, a homogeneous product of maximum purity and without insoluble precipitates is achieved.

## ACTIONS

- INCREASES THE CAPACITY OF SOIL CATION EXCHANGE**
- STIMULATES THE DEVELOPMENT OF THE BENEFICIAL BACTERIAL POPULATION OF THE SOIL**
- STIMULATES RADICULAR DEVELOPMENT**
- INCREASES UPTAKE OF NUTRIENTS BY THE PLANT**

### CROPS

### Dosage L/Ha

Citrus Fruits	30-80
Apple and stone fruits	45-75
Vegetables	40-70
Tropical fruit trees	40-80
Herbaceous and woody crops	20-40
Olive trees and vines	20-45
Flowers and ornamentals	5-60

### APPLICATION

Apply in sprouting of spring-summer, in pre-flowering, in fruit setting and fattening.

Apply in pre-flowering, fruit etting and fattening.

Apply in transplant and along the growing cycle.

Perform 40% of the application with the basal dressing and the rest along the crop

Apply after each cut

Apply before sprouting, in pre-flowering and at the beginning of winter.

**HUMIC ACIDS**
